

Invitation for Sponsorship

Basics of Design of Piled Foundations: A Course and Seminar will be the first short course of the 2019-2020 season, taught by Dr. Fellenius and hosted by the Saskatoon Geotechnical Group.

Dr. Fellenius, Professor of Civil Engineering at the University of Ottawa from 1979 through 2002, is an internationally recognized authority in the field of soil mechanics and foundation engineering, and, in particular, in deep foundations. He is providing a short course on the basics of pile design; a topic appealing to many geotechnical engineers in the province. With the event still a month away, we have already sold over 22 tickets. The short course will be an all-day event at the Park Town hotel in Saskatoon. Lunch and refreshments will be provided.

The SGG is seeking assistance from industry in the form of short course and lunch event sponsorships. With this support, the SGG aims to provide the best experience for our participants and presenters while avoiding financial loss. This will ensure that the SGG maintains the capability of hosting key events, such as short courses and the Cross Canada Lecture Tour, as well as capability to give back to the geotechnical community through our many lunchtime talks and student sponsorship.

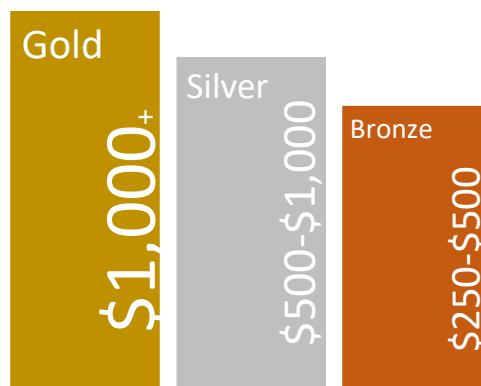

We look forward to collaborating with the Saskatoon geotechnical community. Please see below for details regarding sponsorship opportunities, and visit www.saskatoongeotech.com for information on [upcoming events](#).

Regards,

The Saskatoon Geotechnical Group (SGG)
